

The iviva Platform brings you:

1. Integration

Connect to 250+ of the most commonly used systems and devices of the CRE industry.

Value for you:
siload systems now all work as one

2. Visualisation

Capture, structure and monitor your data from personalised dashboards & widgets.

Value for you:
all your data in one place from any device

3. No-Code

Fine-tune the Platform so it perfectly adapts to you, your team, and your organisation.

Value for you:
future-proofed to suit your evolving needs

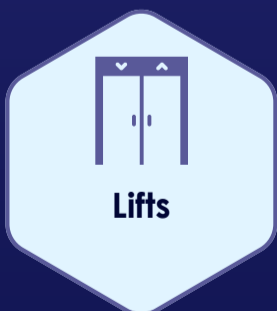

The iviva platform empowers you to improve your operations, one Solution at a time.

Here are some of the Solutions we have created and implemented:

Our Solutions are built to be implemented within 30 days.

With 250+ connectors already built, the Platform can “speak” to most systems that exist within your property and workplace.

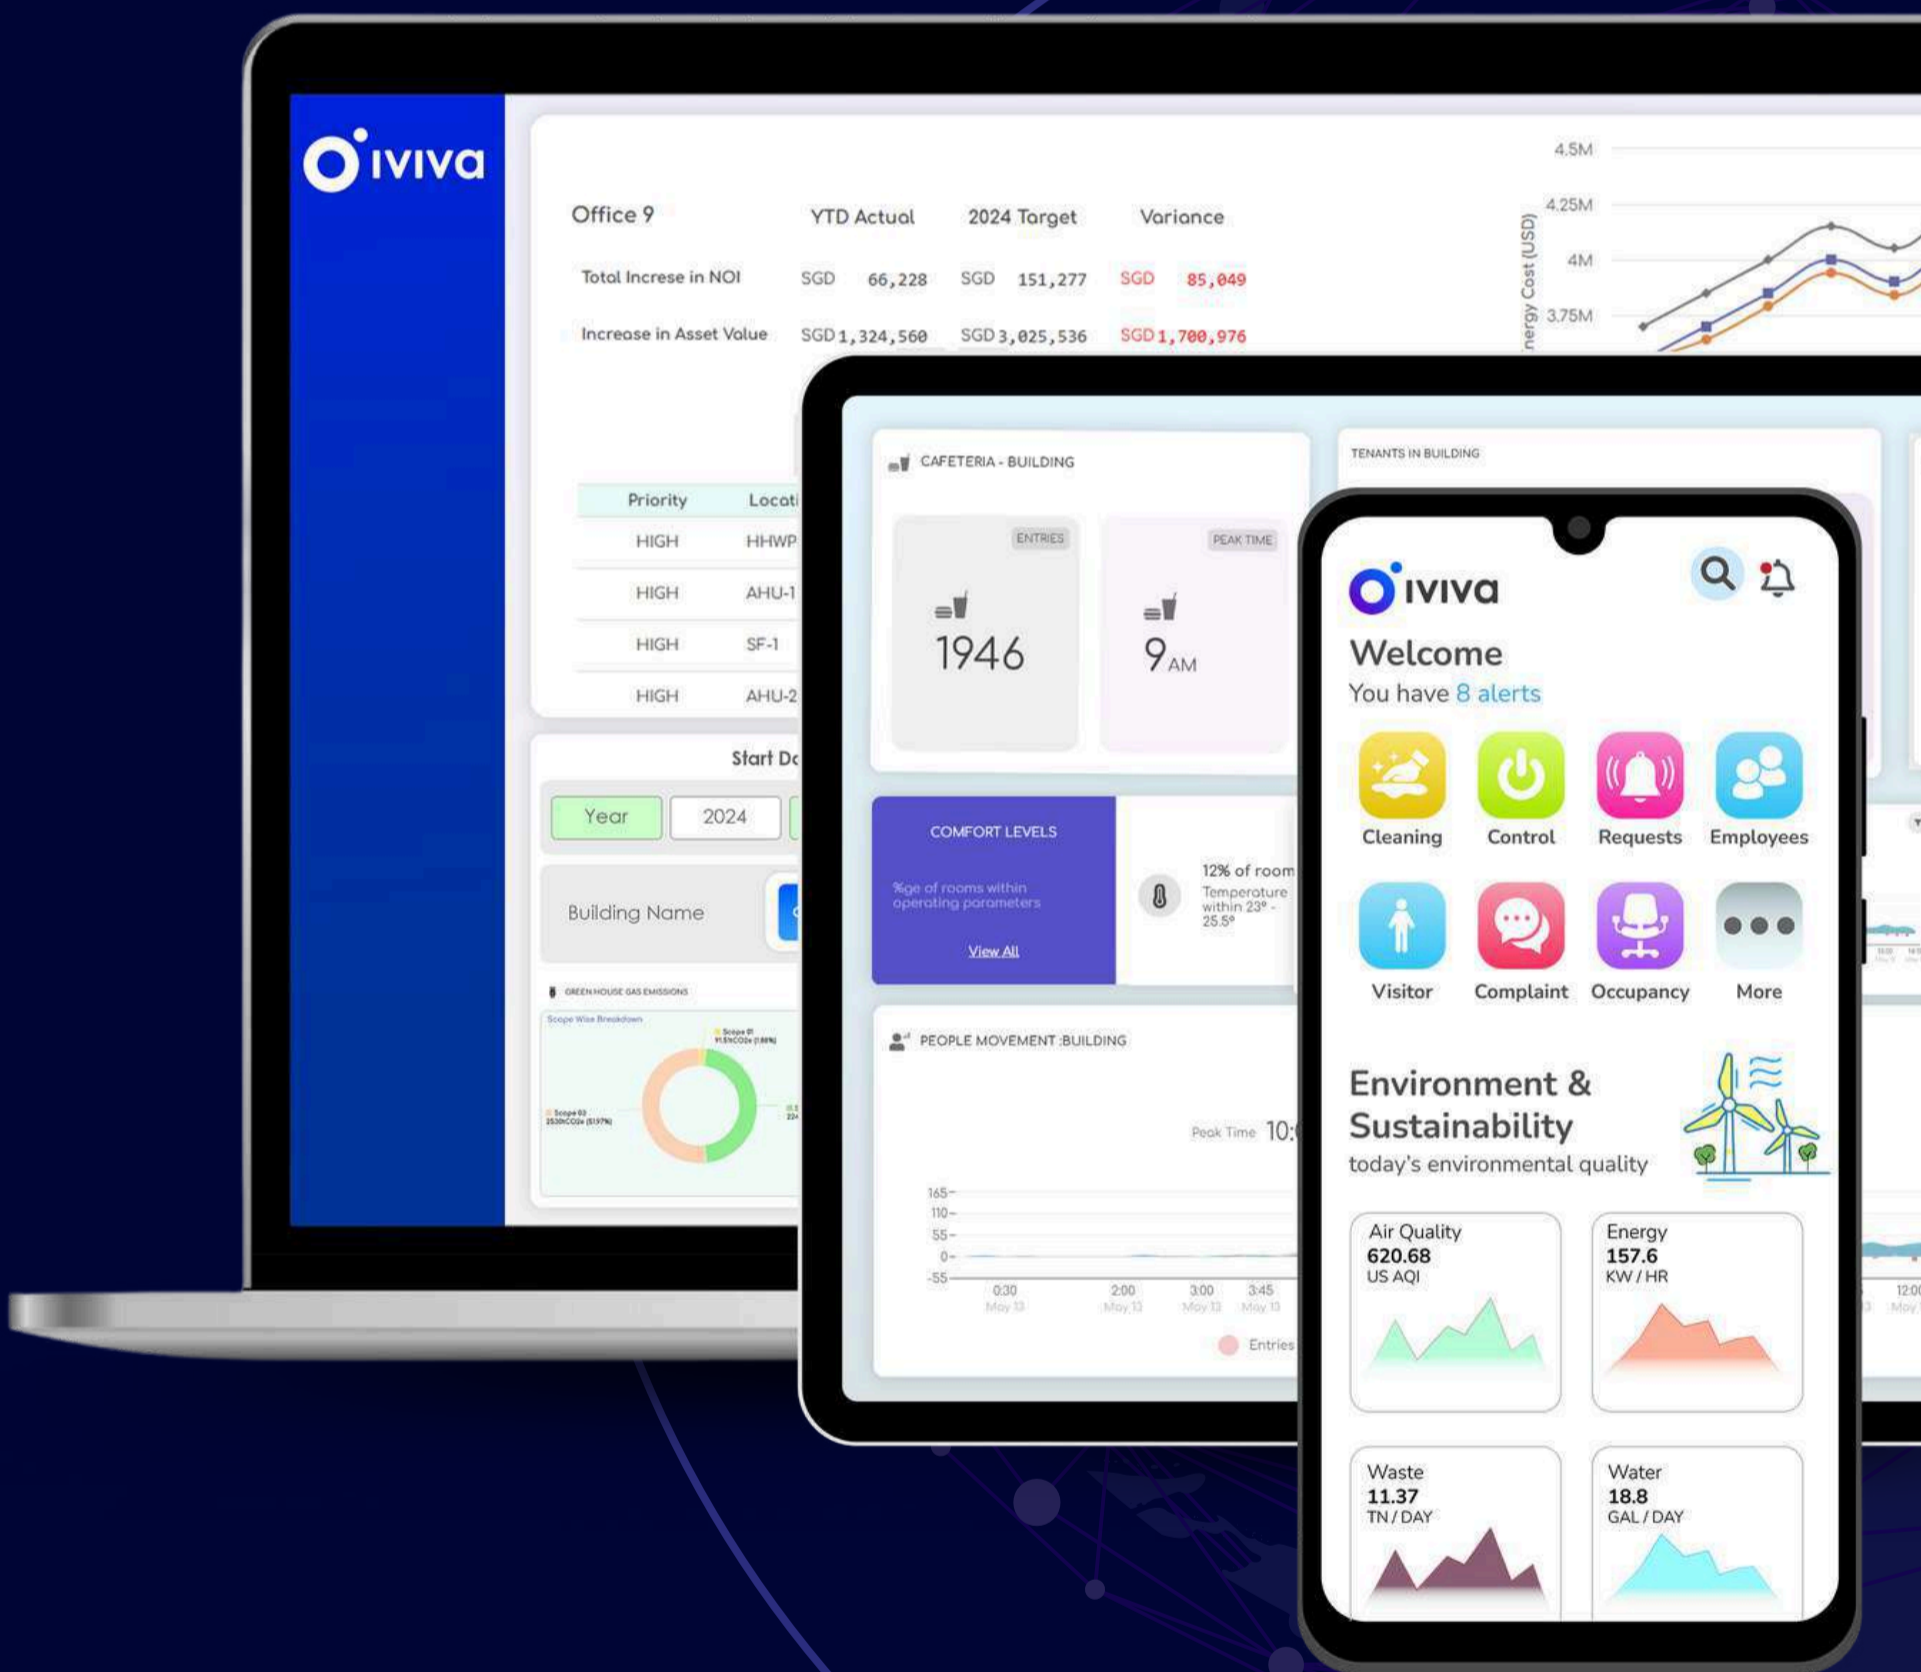

And many more

A PLATFORM READY TO GO ON EVERY DEVICE

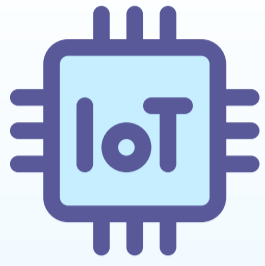

- Protect sensitive data
- Ensures data integrity confidentiality, and availability
- Complies with regulations

By bringing **integration and visualisation** together, the iviva Platform can deliver 100s of Solutions within all types of properties, from office buildings, retail malls, hospitals, sports clubs, airports and more.

WHY ADOPT THE IVIVA PLATFORM

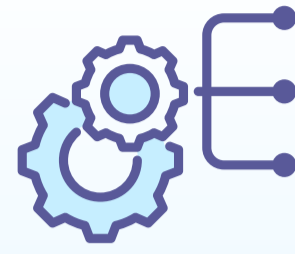

OPENNESS

We work with **any IT, OT and IoT** provider to focus on the expected outcome

ROI

All existing **connectors are free** to ensure cost-effectiveness and fast implementation

SIMPLICITY

We handle **everything** - hardware, software, integration, support and service

20
Years
of Smart
Buildings
& Cities

250⁺ Universal
Connectors

300 Million
Sq Ft
under management

We're a little bias...but this is probably the most reliable and cost-effective Platform for the CRE market.

WHO IS THE IVIVA PLATFORM FOR?

Building owners and operators

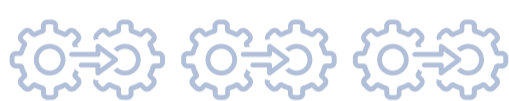

Provide tenants additional services to drive revenue

System Integrators

Easily build cost-effective Solutions for customers

IT Departments

Bring IT and building systems together for optimised workplaces

How long does it take to deliver a working Solution built with the iviva Platform?

If we have the connectors, which we do 90% of the time, it generally takes

less than 30 days

Where have our solutions been implemented?

Mainly in APAC and the Middle East, several 1000s of users connect to the iviva Platform everyday.

~7000 active daily users

Is iviva on the Cloud?

Yes, that's where it all happens but we've done

on-premise

&

hybrid deployments

for specific solutions.

Case Studies

A FINANCIAL SERVICES COMPANY

We addressed our client's productivity challenges by identifying inefficiencies in their workplace operations. By pinpointing that a single employee spent an average of 2-3 hours weekly on mundane tasks like searching for meeting rooms, parking spaces, lockers, and desks, we knew a holistic solution was imperative. Leveraging our expertise, we integrated cutting-edge third-party IT, OT, and IoT systems, encompassing desk booking, visitor management, parking allocation, lighting, HVAC, and occupancy tracking. This seamless integration and data visualisation not only streamlined their operations but also resulted in staggering cost savings of up to 3 million AUD annually.

A LARGE RESEARCH FACILITY

We seamlessly integrated 100's of occupancy sensors into our client's workplace infrastructure, revolutionising their operational efficiency. Leveraging our integration layer, we orchestrated a continuous flow of real-time data, pulling insights every 10 minutes for analytics and automation management.

Our analytics include a comprehensive heatmap of the workplace illuminating high-traffic areas and optimising spatial utilisation. Further, tracking meeting room occupancy in real-time empowers stakeholders to gauge room availability, preventing over-occupancy instances and enhancing meeting efficiency. This enabled our client to experience improved productivity and streamlined operations as well as optimised space utilisation which translates to significant cost savings and enhanced employee satisfaction

**Let's work together and
get your property smarter,
one Solution at a time.**
